## MICROBLADING

Microblading is a form of semi-permanent makeup which creates amazing realistic hair stroke brows. During the treatment the hand tool which uses fine needles deposits pigment within the upper dermis layer of the skin, to create the illusion of fuller brows with more definition. As each hair stroke is hand bladed, we will match the look of your own hair colour and texture so the results are very natural, making the Microblading indistinguishable from your real eyebrow hair. This is why Microblading is a very popular, low maintenance choice for all, especially clients with patchy, fair, or thin eyebrows.

To find out more and how this treatment will benefit you, please visit our Microblading page on our website, [www.omorfiamicroblading.co.uk](http://www.omorfiamicroblading.co.uk). Alternatively, please contact us for a no obligation consultation.

Microblading (Initial and touch up appointment).....£295

This is a two-part process. The first appointment we use subtle hair-like strokes to create fuller, more defined brows whether you have natural eyebrow hair or none at all. Each pair of brows is a work of art and individual to you, from the shape and placement of the brows to your natural skin undertones and hair colour.

At the second appointment we will 'touch up' your treatment which will be between 4-6 weeks after your initial Microblading appointment.

Microblading Refresh / Colour Boost.....£175

This treatment is to refresh your brows and enhance the shape and colour. We highly recommend this to be carried out between 12 and 18 months after your last Microblading treatment.

## EYEBROW TREATMENTS

|  |     |
|--|-----|
| Eye Brow Tint.....                               | £10 |
